YAESU FT-2900R
(Bold = hold for 1 sec; CAPS = tap quickly)

Set Power Level: LOW(A/N) repeatedly to desired level

Scan: MIC UP **or** MIC DOWN, rotate dial to reverse direction
MIC up **or** MIC DOWN **or** PTT to stop

Set CTCSS Tone: MHz(SET)
       DIAL "SQL TYP" (49), then MHz(SET)
       DIAL "TONE", MHz(SET)
       DIAL 3 clicks clockwise to "TN FRQ" (52)
       MHz(SET), then DIAL desired frequency
       MHz(SET)

Tone Off: MHz(SET)
       Dial "OFF" (one click back from Tone)
       MHz(SET), **MHz(SET)**

Reverse Repeater input and output: REV(DW)

Disable Repeater Offset: IN VFO MHz(SET)
       DIAL "RPT" (43), then MHz(SET)
       DIAL "SIMP" **MHz(SET)**
       Rotating frequency dial one click will revert to normal offset

Memory Store: Select frequency (and CCTSS Tone)
       D/MR(MW)
       DIAL location if not next available
       D/MR(MW)

Memory Recall: D/MR(MW) toggles between memory and VFO

Memory Label: Recall memory channel
       MHz(SET), then DIAL "NM SET" (30)
       MHz(SET), then DIAL first character
       A/N(LOW) to next character
       (DW/REV) to back up)
       MHz(SET), **MHz (SET)**

See Memory Channel Frequency: **LOW(A/N)**   toggle

Weather Channel: Mic P4
